Note: Water treated with Reverse Osmosis purification often gives a false water indicator. Rather use filtered mineralised water. If your ice-maker indicates a low water level despite being full, it may not detect certain purified water types. Simply add a pinch of salt to the water reservoir to enhance sensor accuracy. This is a common fix when using reverse osmosis water. Ice cycle time is dependent on water temperature. Clean and drain the unit at least once or twice a month. Lemon juice or 10ml vinegar can be added to the water to help the cleaning process. Adjustable Leveling Feet (+/- 10mm)

Suggested Applications: Office, Apartment, Home Bar/Kitchen, B&B
